

# KNOW YOUR STATUS

27% of people living with HIV  
in Canada do not know they are infected

Why should I get tested?

If you are HIV positive, you can get support to stay healthy and take precautions not to spread the virus. If you are HIV negative, you can learn more about how to reduce your risk of becoming infected.

Remember it is not who you are,  
but what you do that puts you at risk.

Know your status.  
Learn how to reduce your risk.  
Help stop the spread of HIV.

It's time.
