

Wainfleet Water and Sewer Project Private gas or water service locates required

The Township of Wainfleet and Niagara Region have retained AECOM to draft the preliminary design of a water and wastewater servicing system for the properties in the Lakeshore area of Wainfleet.

In an effort to eliminate potential disruption to private services in the future, residents are asked to provide any information they may have regarding the location of underground private services (gas or water excluding Long Beach Water System) in the area. Locate information can be provided, to Mary Lou Tanner at Niagara Region or Livia McEachern at AECOM.
