Development Information

Development name:	Developer/builder name:
Address:	Municipality:
Contact person:	Phone no.:

Terms and Conditions

The request is for service at a new development that currently does not receive waste collection services at the address listed.

The property must be approved during the planning process and be in compliance with the Requirements for Waste Collection to receive waste collection services.

New homes will only receive waste collection once access to the street is free from obstruction and construction vehicles.

Collection cannot begin until the development has a minimum of one (1) permanent occupant and clear access is maintained.

Niagara Region staff will visit the site to confirm site approval conditions have been met and to ensure safe and unobstructed access is available before waste collection services can begin.

The developer or builder is responsible for waste collection until Niagara Region waste collection services can commence and must adhere to the Environmental Protection Act – Ontario Regulation 103/94, specific to source separation programs.

For private properties: The Acknowledgement form which indemnifies travel on private property has been signed and submitted.

In the event that collection is not possible due to obstacles, please contact (developer/builder contact) at telephone number listed above, who will address/correct this issue within one (1) hour and advise when the obstacles have been removed. Upon receipt of this confirmation, a second and final attempt to collect materials curbside will be made by the waste collection contractor.

The roadway must be clear of ice and snow.

I hereby certify that the information provided is true and accurate.
