

Bike traffic signs and hand signals

Time: 15 minutes

Materials

- Bike traffic signs and hand signals labelling worksheet
- Bike traffic signs and hand signals answer sheet
- SMART Board

Instructions

- Distribute a worksheet to each student
- Instruct the students to correctly label the signs using the word bank provided
- Allow students to complete the worksheet independently or in pairs
- Project the blank worksheet onto the SMART Board to correct it together as a class
- For each of the signs, have a student identify the correct label. Once the student has responded, ask the class if they agree with the response (e.g., "thumbs-up/thumbs-down")
- If the answer is correct, confirm and write the word onto the worksheet
- If the answer is incorrect, ask another student to provide an alternative or provide the correct response

Variations

- To make this activity more difficult, remove the word-bank from the worksheet

Quick Review: This activity can be used for quick review or enrichment in the form of a matching game (individual, pairs, small groups, or whole class).

- Print the answer sheet onto paper and cut out each of the signs and descriptions
- Glue each sign and description onto a separate cue card
- Pairs and small groups: The students can use these as cards for games like Memory (can also be individual) or Go-Fish, matching the sign with its description. The student who collects the most matched signs wins

Teaching Tool

Topic: Personal Safety & Injury Prevention

- Whole class: Each student can select one of the cards and then try to find his or her "buddy" (the person with the corresponding description or sign). The buddies who correctly pair up most quickly win
