

Learning Activity

Show what you know

Materials

- [Show what you know worksheets](#)
- [Show what you know answer sheet](#)

Instructions

- Distribute a worksheet to each student
- Ask a student to read the instructions on the worksheet aloud to the class
- Have students complete the worksheet individually or in pairs
- Correct the worksheets as a class
 - Project a blank worksheet onto the SMART board
 - Go through each question, having students provide their answers
 - Correct and supplement any information using the answer key and the Core Knowledge Content as needed
 - Write correct response to each question on the projected worksheet before moving on to the next question
- Ask students how well they feel they were able to complete the worksheet
- Ask them to reflect on what they learned and what prior knowledge they were able to use

Variations

- Use the worksheets as a formal assessment activity by having students complete them individually and collecting the worksheets to mark them
- Read questions aloud for struggling readers
- Allow struggling writers to respond to short answer questions verbally and/or have someone scribe responses on the worksheet
